

Harbor-Time® is designed for use in various marine and industrial applications. Its unique color, enhanced with a proprietary clear coating on both sides has exceptional abrasion resistance. Stabilized for minimum stretch or shrinkage will ensure continuous fit throughout application. This highly water repellent, mildew and UV resistant fabric has superior strength and long-lasting color. To keep Harbor-Time looking clean and bright, wash periodically with a soft brush, warm water and mild soap (do not use detergent). All backed by a 5-year limited warranty.

Because Harbor-Time is water repellent, the use of vents when fabrication a mooring cover is recommended. A clear vinyl should be sewn at contact points when total protection against rub-off is desired. This fabric is non flame retardant, and should not be exposed to direct flame or extreme heat.
