

Do not stow window when dirty as it may scratch and do not stow window when it is wet as mildew may form.

CLEANING AQUA-VIEW VINYL WINDOWS

Vinyl windows should be cleaned regularly. Be sure to hose or blow off loose dirt particles from surface and then use either plain water or mild soap and water solution. Apply with a soft cloth or tissue to gently clean window. Never use harsh brushes or abrasives when cleaning vinyl windows.

The effect of sunlight combined with environmental pollution may sometimes alter the chemical structure of your window vinyl, resulting in discoloration and brittleness.

To maintain the clarity and extend the life of your window vinyl, it is recommended that you regularly wash dirt and salt off the surfaces.

Do not use harsh detergents when washing your vinyl window, a mild detergent in water applied with a soft cloth may be used.

Do not use products containing silicones or alcohol on your vinyl windows, such as typical commercial vinyl care products and glass cleaners.

Do not rub vinyl windows when dry- this will scratch the window. Always flood the window with water before gently wiping it with a damp, soft cotton cloth.

Regular treatment with M210 Aqua-View Cleaner polish will help protect and prolong the life of the window.
